Tarvos Design Kit

v 1.0.0 — Light Grey theme

This is a collection of components and styles for rapid design and prototyping the Exein products.

Document structure

This document has several artboards as follows:

Page	Description
Getting started	Instructions on how to use the kit
Grid	Preset artboards with the grid system for responsive web design.
UI Patterns Components	A collection of assets that correspond to the Tarvos Design
Website UI Patterns Components	A collection of assets that correspond to the Tarvos Design for Website: Desktop/Mobile use.

Document component — usage

Use the [Link Assets](#) button or the '+' icon within the Assets panel to link the design system to your new file. Once added, you can add components from this file onto other artboards within this same file. Colors, Type Styles, and Components are organized within the Assets panel; within each component there are the variations, pieces and states of each component.

Text Styles — usage

You can access Text Styles by selecting a text box then going to the Assets Panel and selecting the style from list within Character Styles to apply the Carbon type tokens to an element. Text styles are based on the typography that is described on "Elements" page of this document.

Component states — usage

Select a component once it's been placed on the canvas to create your UX UI prototyping or Design.

Tarvos Grid

As a designer, we always craft and maintain the quality of the work. We provide a major set of breakpoints for you to start with. We should always consider and care how your design works across screen sizes. Ignoring one of the artboards will lead to poor user experiences. We also provide additional Breakpoints for conveying content/layout adjustments.

Getting Started

To get started with your design, copy and paste the artboards to the right into your new document. To view layout go to "[View → Show Layout Grid](#)" and the units at "[View → Show Square Grid](#)".

Major Breakpoints

Small

Screen Width at 0px+
Columns: 4
Padding: 16px
Margin: 18px

Medium

Screen Width at 672px+
Columns: 8
Padding: 16px

Large

Screen Width at 1056px+
Columns: 12
Padding: 16px
Margin: 80px

xLarge

Screen Width at 1312px+
Columns: 12
Padding: 16px
Margin: 76px

Max

Default Freeze is at 1584px
Columns: 12
Padding: 16px
Margin: 76px

Overview

Welcome to Cosmo

Automate the analysis and identification of security vulnerabilities inside your devices. All in one place, with intelligent prioritisation and proprietary rating.

Access your vulnerability

Know exactly where the most dangerous vulnerabilities are, and address them in a smart way.

No need for any access to the device source code or expensive penetration testing.

Multi-system detector

Use one tool to test multi-system devices: Linux, RTOS, UEFI and Docker.

Get all the intel you need about your device's security in one place: simple and convenient.

Scan for Free

Don't spend a fortune for running a test.

Analyse and assess the security of your devices before you launch them, for free.

MOBILE VIEW
